Elijah Enuem-Udogu

Team Lead / Senior Full Stack Engineer / AI Engineer. Expert in React, Next.js, Angular, Node js
Lagos State, Nigeria

Summary

I'm a full-stack web developer proficient in React, Next.js, Angular and Node JS. I have 6+ years of experience working on solo projects and with remote teams. My GitHub profile link is <https://github.com/elikeyz>

Experience

GitStart Community (YC S19)

4 years

Software Engineer

October 2021 - September 2025 (4 years)

United States

- Built the FX Quotes module for an FX platform with React and Ant Design.
- Built the withdrawal form panel for a card payment application with React and Ant Design.
- Built the AI chat interface for the AI Ticket Studio with React and Shadcn UI, which launched as #1 on Product Hunt.
- Integrated several telematic providers on a serverless microservice built with TypeScript that helped a transportation visibility company expand its support to new providers.
- Wrote a data migration and ingestion script using TypeScript that collects information on thousands of browser extensions on the Chrome Web Store for a browser extension auditor platform.
- Built a privacy analyser and threat intelligence module for a Chrome extension with React.
- Built several features for an AI Governance Infrastructure and Monitoring platform with Angular and Nest.js.

Team Lead

October 2023 - January 2025 (1 year 4 months)

United States

- Mentored and managed a team of developers.

- Helped developers improve their skills and performance to enhance team productivity.
- Enforced strict compliance and performance standards, leading to the team becoming one of the most productive in the company.

Technical Project Manager

November 2021 - October 2023 (2 years)

United States

- Led a team to build a landlord module for a BioData Verification app with Angular, add mobile signup features to an enterprise SaaS document management app with React, build an invoicing API for a fintech company with Node.js, and add new features to a factory assembly line platform with TypeScript.
- Achieved successful completion of projects resulting in improved user experience and increased efficiency for clients.
- Developed strong project management, team leadership, and technical skills in a fast-paced startup environment.

Mochi Health

Frontend Engineer

November 2022 - June 2023 (8 months)

San Francisco, CA

- Built the eligibility multi-step form for the Mochi Health patient portal with React and Tailwind CSS.
- Built the patient, provider and admin portals with React and Tailwind CSS.
- Built the new version of the company website with Next.js and Tailwind CSS.
- Built some of the V2 features of the patient portal, including a patient progress tracker chart and a TDEE calculator with React, Recharts and Tailwind CSS.

Runa

Software Engineer

April 2022 - July 2022 (4 months)

Mexico City, Mexico

- Worked with the Events team
- Added some new features to the Events Module with React and Node.js.
- Fixed some underlying bugs and made improvements to the code structure.
- Made numerous design and accessibility improvements to the application.

Commsworth

Frontend Devops-Analytics Engineer

March 2021 - May 2022 (1 year 3 months)

Lagos

- Built a loan and mortgage management application, Credicity, with Next.js and GraphQL.
- Built a food-ordering e-commerce PWA, Mealstock, with Next.js.
- Built the official Credicity and Credipay websites with Next.js.

eTranzact Global UK

Frontend Developer

April 2021 - March 2022 (1 year)

Lagos

- Built the Xcel support portal for transaction and KYC support, and issue resolution with Angular.
- Built the official Kyiara website with Angular.
- Rebuilt the Xcel admin portal for transaction monitoring and issue resolution with Angular.
- Built the Xcel Agent Collections module with Angular, which was included in the Campost launch for tuition payments.

JHELY Bolivia

Full Stack Engineer

March 2021 - December 2021 (10 months)

Lagos

- Redesigned the user interface of the real estate application with Next.js.
- Added multi-currency support to enable agents to add property prices in US Dollars or Bolivian Bolivianos.
- Built a customizable agent feature with Next.js and Node.js to allow agents to create custom listing pages on the real estate application
- Wrote scripts with TypeScript to enable agents to transfer data from their websites to the real estate application

Mira Technologies

Software Developer

June 2020 - March 2021 (10 months)

Lagos, Lagos State, Nigeria

- Built a payment application and developed external API plugins for it.
- Built a training portal to automate registration of students
- Built a hotel website with Wordpress with automated booking features
- Built a token-based registration system for a personnel and payroll management application

- Built an enterprise business management software backend with PHP

FMT Labz

Full Stack Developer

March 2020 - June 2020 (4 months)

Benin City, Edo State, Nigeria

Self employed

Full Stack Web Developer

June 2018 - June 2020 (2 years 1 month)

Benin City, Nigeria

Andela

Learning Community Ambassador

April 2019 - December 2019 (9 months)

Benin-City, Edo, Nigeria

I mentored beginner developers online and offline to get them started in learning web development.

Education

University of Benin

Bachelor of Engineering - BE, Electrical and Electronics

Engineering · (2011 - 2015)
